

What steps can I take to prevent theft and property damage?

This is an easy one! Ninety-nine percent of the prevention you can do!

- 1) Close the garage doors and the man-doors immediately after leaving or entering. This prevents anyone from sneaking in.
- 2) IF you see a garage door up, and no one around, reach around from the outside and push the button to close it.
- 3) IF you see someone you don't know hanging around, watch them. IF you feel comfortable - take a photo of them and/or ask them what their unit number is. Strangers won't know the sequence of our addresses.
- 4) Install a deadbolt on your storage room door.
- 5) Lock your car doors.
- 6) Pull the garage man-doors shut behind you **AND check it is closed.**
